ZL Technologies Showcases Enterprise Information Archiving Capabilities

This is a Press Release edited by StorageNewsletter.com on Thu, February 3rd, 2011

For IBM Lotus Notes and Domino

ZL Technologies, Inc. showcases its ZL Unified Archive at IBM Lotusphere 2011.

ZL Unified Archive provides a solution to govern enterprise information across the organization and is designed for out of the box integration with IBM Lotus Notes and Domino. The solution is able to index, store, and de-duplicate all Lotus Notes emails and attachments passing through the Domino server in a centralized repository. In addition, ZL Technologies can support mixed e-mail environments of IBM Lotus Domino, Exchange, or any other major e-mail platform in a single deployment utilizing a single, consolidated archive.

ZL Unified Archive for Lotus Notes and Domino
has been implemented by Fortune 500 organizations to:

- Ingest and archive millions of messages a day in large Lotus Notes email environments
- Mitigate regulatory risk (e.g. FINRA/SEC) by automating Lotus Notes archiving and retention management
- Reduce E-Discovery costs and create a workflow with the intent of enabling legal and compliance teams to be self-sufficient
- De-duplicate mails and attachments across all Lotus servers in a deployment automatically through fully customizable mailbox management policies
- Decrease Lotus Notes backup costs
- Index, store, and restore retired Domino applications.
- Dynamic and efficient migration between mixed environments (from Lotus Notes or Microsoft Exchange)
- Archive Lotus Quickr files for Compliance and E-Discovery
